Revolutionizing Patient Care with Robotic Surgeries

PKLI&RC takes great pride in pioneering the establishment of a Robotic Surgery setup through a public-private partnership in Punjab. This innovative approach marks the dawn of a new era characterized by surgical precision and elevated patient care standards. Currently, our Urology department is utilizing robotics for surgical procedures which serves as a testament to the advancements in medical technology. Our surgeons have undergone specialized robotics training to execute intricate surgeries with heightened precision, leading to enhanced outcomes. This includes procedures such as kidney cancer surgery, stone removal, reconstructive surgery, penile surgery, as well as interventions related to prostate and bladder cancer. The introduction of robotic surgery at PKLI presents a minimally invasive solution that significantly transforms the landscape of surgical practices in Pakistan.

“Musaab's Inspiring Recovery After Kidney and Liver Transplants at PKLI”

In an inspiring story of bravery and determination, young Musaab's path to recovery at PKLI stands as a beacon of hope. At the tender age of three, he began experiencing mysterious stomach pains, causing his parents great concern.

Following multiple hospital visits and diagnostic tests, a heart-wrenching diagnosis was revealed. He had initially been diagnosed with potential kidney stones which ultimately developed into a more severe kidney and liver condition. This was a devastating blow to his parents when they were informed that their only child required both kidney and liver transplants to survive.

Their anxiety led them to seek help at the Pakistan Kidney and Liver Institute (PKLI), a renowned institution for life-saving procedures. The professionalism and compassion of the medical team instilled confidence in Musaab's parents regarding the treatment. His cousin selflessly donated a portion of his liver and his mother volunteered her kidney to save his life.

On the day of the transplant surgeries, emotions ran high. Musaab's parents clung to hope and fear as the operating room doors closed. The hours felt like an eternity until the surgeons delivered the incredible news of the successful kidney transplant. Astonishingly, just four months earlier, he had also undergone a liver transplant, both expertly performed by the dedicated team at PKLI.

Musaab's body embraced the new organs, marking a triumphant turning point in his young life. Tears of joy flowed as his parents embraced their resilient little warrior, a testament to their profound gratitude and happiness.

His journey of strength now serves as an inspiration to all who hear this story. Musab's parents express deep gratitude for the compassionate, professional and expert care they received at PKLI during this challenging period.

PM Shehbaz Sharif Performs Ground Breaking Ceremony for PKLI University

“ The university is designed to be a hub of innovation, research and learning by spanning an impressive 70,000 square feet in total area with a vast covered expanse of 190,000 square feet. ”

A prestigious event was held on August 06, 2023 at the Governor House Lahore where former Prime Minister Muhammad Shehbaz Sharif performed the ground breaking ceremony of PKLI University. This ceremony marked a historic milestone in the journey of PKLI to revolutionize the landscape of education and healthcare in Pakistan.

The event attended by distinguished guests, including Mr. M. Baligh Ur Rehman; Governor of Punjab and Prof. Dr. Javed Akram; Caretaker Health Minister Punjab.

The university is designed to be a hub of innovation, research and learning by spanning an impressive 70,000 square feet in total area with a vast covered expanse of 190,000 square feet. This state-of-the-art facility will house cutting-edge teaching and training facilities with extensive libraries and a world class auditorium, aiming to elevate the standards of education and healthcare services in the region. The event also saw the presence of the esteemed PKLI team of consultants whose expertise and dedication have been instrumental in shaping the university's vision.

PKLI Organizes an International Conference for the Elimination of Hepatitis C

“ Hepatitis free Pakistan by 2030 ”

Pakistan Kidney and Liver Institute and Research Center (PKLI&RC) organized an International conference with the theme "National Hepatitis C Elimination Campaign: The Way Forward" on August 7, 2023. The objective was to raise awareness about Hepatitis C and present a comprehensive strategy to curb its future spread. Mr. Ahsan Iqbal; Minister of Planning, Development and Special Initiatives graced the event as the Chief Guest. He praised PKLI's unwavering commitment to eradicate hepatitis C by 2030.

Dr. Usman Aujla; Director of Strategic Planning & Chairman Gastroenterology & Hepatology delivered a welcome speech followed by Prof. Dr. Saeed Akhtar; Chairman of PKLI's Board of Governors who elaborated on the roadmap and strategies for effectively reducing the disease's prevalence in Pakistan on a national level. Similarly, Dr. Javed Akram; Caretaker Health Minister Punjab, Prof. Faisal Saud Dar; Dean PKLI, Dr. Imam Waked from Egypt, Dr. Palitha Mahipala; WHO Representative and Dr. Philippa Easterbrook along with other prominent health professionals from Pakistan and abroad delivered enlightening presentations.
